KENTAUR[®]
Work Wear of Denmark

Made for people. ***At work.***

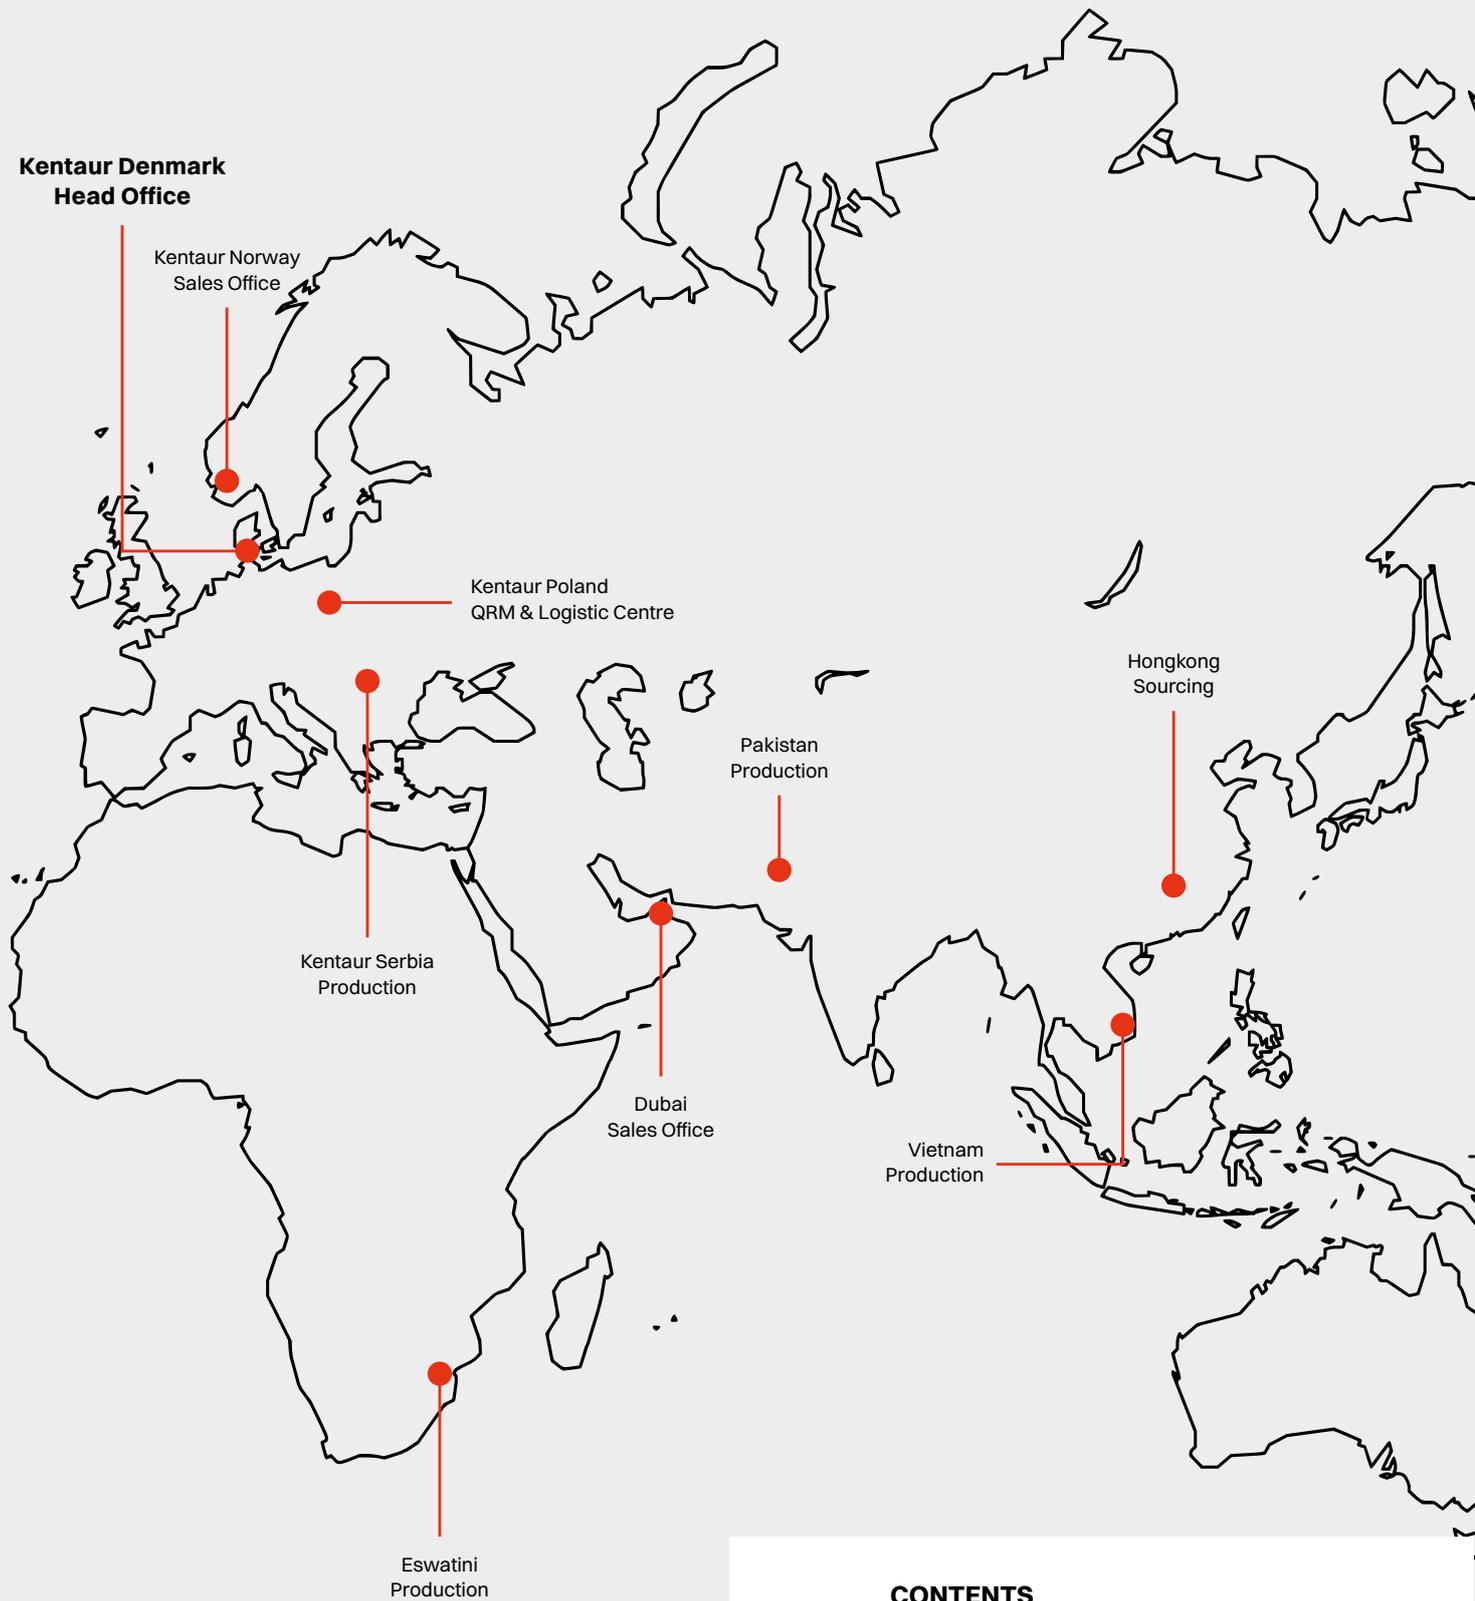

Workwear matters. To the celebrated Chef de Cuisine and the busy waiter. To the dedicated clinic employee and the compassionate healthcare assistant. And to most other people at work.

Therefore, since 1990, Kentaur has focused on creating workwear that, in addition to looking good, is also comfortable and functional, down to the smallest detail - giving you workwear you actually enjoy wearing.

At the same time, it is our ambition that each and every piece of clothing is created to add value for professional laundries within the textile service sector. Specifically adapted to their business models and requirements. We strive always to maintain a responsible supply chain and act proper in everything we do.

We are Danish - in our essence, our business ethics, our organizational culture, and in our relaxed and straightforward dealings. With each other. And with our customers and partners.

Bottom line, what we do, we do for people. *At work.*

Thinking about responsibility. *At work.*

For us, responsibility is more than just a word or a concept. It is our unwavering commitment. You should, therefore, see our Work.Wear&Care strategy as a testament to our dedication to crafting workwear that goes beyond mere functionality - it is about responsibility, accessibility, and making a positive impact on our world. When you choose Kentaur workwear, you choose more than just a garment; you choose:

- **High Durability & Long Lifetime:** We create products that stand the test of time, wash after wash.
- **Timeless Styles with a Long Product Life Cycle:** Our designs are not just for today; they are for the future, ensuring your workwear remains relevant and enduring.
- **Social and Environmentally Responsible Production:** We are on a continuous journey to reduce our social and environmental footprints, making every step count towards a better world.
- **Circular Take-Back Solutions:** We believe in second chances. Therefore, we are working on finding solutions to give old garments a new life, reducing the impact on landfills.

Our Work.Wear&Care strategy is not just about us. It is about contributing to The 17 Global Goals for Sustainable Development. Focused on goals 8 (Decent Work and Economic Growth), 12 (Responsible Consumption and Production), and 13 (Climate Action), we are making strides toward a better future. Join us in making every workday not just about what you wear – but about the positive impact you create.

To put it simply, we continuously think about our responsibilities. At work.

Responsible Choice

As part of our Work.Wear&Care strategy, we are consistently striving for more responsible solutions when developing and selecting our materials.

Items with responsible materials are marked with "Responsible Choice." All items with this label contain materials that are a better alternative to conventional ones. In our Responsible Choice category, you will find items containing materials such as TENCEL™ Lyocell, TENCEL™ Lyocell x REFIBRA™ Technology, REPREVE® recycled polyester, cotton sourced as Better Cotton, or fabrics with recycled cotton and/or polyester.

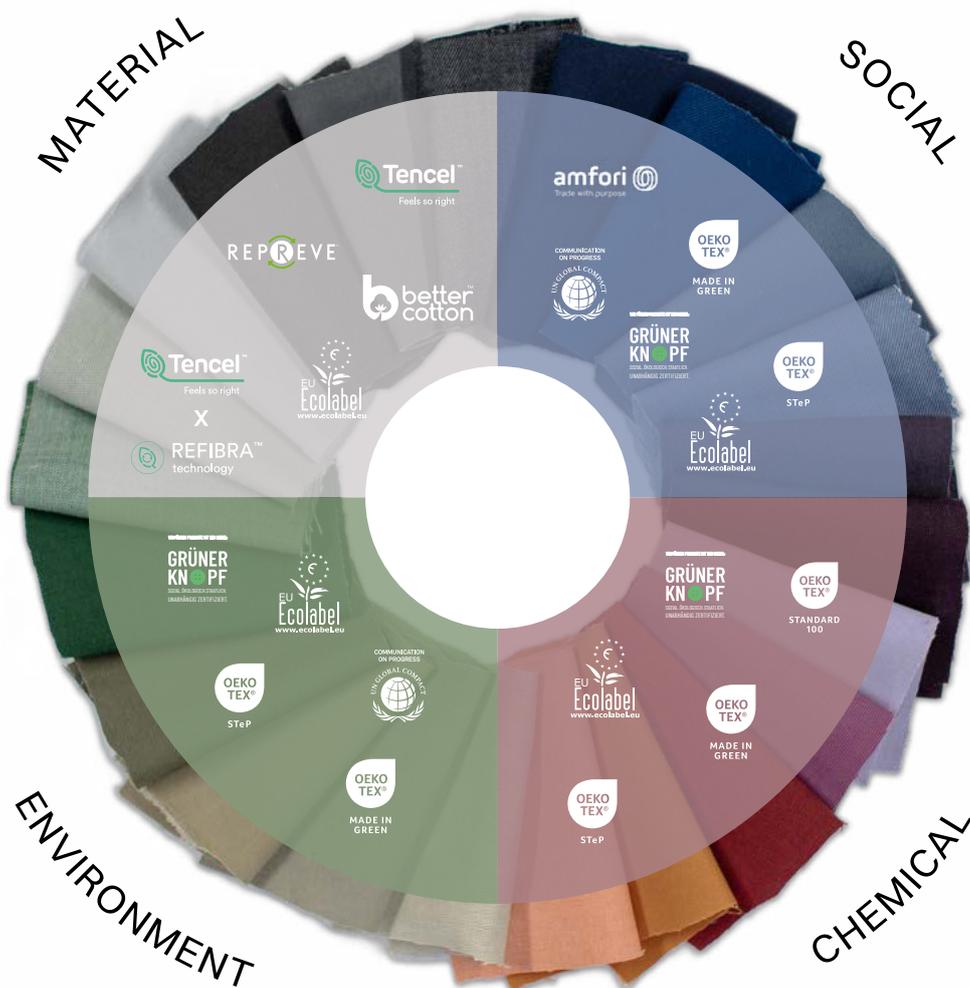

It has always been crucial for us to create workwear with a long lifespan. Therefore, the fabrics we use in our production must meet high standards. We ensure this by conducting various wash and wear tests, guaranteeing that our items are laundry-proof. Moreover, the high quality of our articles contributes to limiting resource waste. Whether our items are labeled Responsible Choice or not, you can always expect garments with high durability and longevity. Our passion for progress means that we continuously explore the

market for more responsibly sourced materials for production. You will, therefore, discover more alternatives to conventionally produced fabrics in the future.

BETTER COTTON

Kentaur is a proud member of the Better Cotton Initiative. With our membership, we have committed ourselves to improving global cotton cultivation. Better Cotton operates as a mass-balance system. Hence, purchasing a product with the Better Cotton logo is not a guarantee that the product itself contains cotton from Better Cotton-certified farming. However, by buying a product with sourced Better Cotton, you contribute to our investment in Better Cottons mission.

All the cotton used in our products labeled "Responsible Choice" comes from Better Cotton. However, we only mark products with the Better Cotton logo when cotton is the dominant material in the product. If you want to learn more about Better Cotton, visit bettercotton.org/massbalance. We are committed to sourcing 50% of our cotton as Better Cotton by 2025.

MATERIAL WITH RECYCLED TEXTILES

Our materials with recycled textiles contain recycled textile fibers from pre- and/or post-consumer textiles. Pre-consumer textiles are textile waste from production, while post-consumer textiles are textiles that have been worn out in their current form.

The material quality is developed for industrial laundries, ensuring good durability and colorfastness. The percentage of recycled material in the fabrics can vary from style to style. If you want to know the precise percentage of recycled material, you can always find this information on the individual product.

REPREVE® RECYCLED POLYESTER (rPES)

REPREVE® is polyester made from used plastic bottles. REPREVE® works to create a cycle where waste is recycled.

TENCEL™ LYOCELL

TENCEL™ LYOCELL fibers are derived from controlled or certified wood sources and produced in a closed loop process, which recovers 99,8% of the solvent -

resulting in a close-to-zero wastage. The fibers support a natural dry feeling through moisture control and are naturally soft and smooth to the touch. TENCEL™ is a trademark of Lenzing AG.

TENCEL™ LYOCELL x REFIBRA™ TECHNOLOGY

To produce TENCEL™ Lyocell with REFIBRA™ Technology, wood and cotton textile waste are used as raw materials. The fibers contain a minimum of 30% recycled materials. TENCEL™ Lyocell fibers with REFIBRA™ Technology offer the same benefits as standard TENCEL™ Lyocell fibers. Like TENCEL™, REFIBRA™ is also a trademark of Lenzing AG.

EU ECOLABEL

EU Ecolabel is the official eco-label of the European Union. This recognized eco-label is known for its stringent environmental requirements, ensuring that certified products are more sustainable. By including the entire product life cycle in the assessment, it ensures that only products meeting these criteria receive certification.

MEMBERSHIPS & CERTIFICATIONS

THE UN GLOBAL COMPACT is the world's largest sustainability initiative for businesses, focusing on 10 principles distributed across four main areas: human rights, labor, environment, and anti-corruption.

Each core area is embedded in our strategy, where we have defined corresponding activities that are implemented daily to ensure development and improvement.

AMFORI BSCI works to enhance social conditions in global supply chains. Amfori BSCI is one of the initiatives ensuring continuous improvement in our efforts related to human rights, labor rights, and anti-corruption.

As a member, we commit to performing in the 13 performance areas that constitute the foundation of Amfori BSCI's Code of Conduct. Likewise, our suppliers also commit to adhering to Amfori BSCI's Code of Conduct and undergo regular third-party audits.

The social performance areas include aspects such as occupational health and safety, fair compensation and working hours, employee involvement, and the prevention of discrimination, child labor, or forced labor.

WE ARE PIONEER PARTNER OF TEXTILE REVOLUTION

Textile Revolution is an independent think tank dedicated to making the textile industry more sustainable. They achieve this by providing advice and sharing knowledge with their members, enabling them to optimize their business processes.

OEKO-TEX® STANDARD 100 is a certification for products that assures the consumer that no components of a Kentaur product contain substances that are harmful to health or the environment in larger quantities than permitted in product class II (products in contact with the skin).

OEKO-TEX® SteP is a certification for production companies that encompasses a comprehensive assessment of chemical management, environmental impact, environmental management, occupational health and safety, social responsibility (CSR), and quality management.

OEKO-TEX® MADE IN GREEN is a labeling for OEKO-TEX® STANDARD 100 certified products from an OEKO-TEX® SteP-certified production.

GRÜNER KNOPF is a certification for responsible textiles. The certification imposes binding requirements for the protection of people and the environment in the textile supply chain.

Both companies and products are subject to specific criteria. Grüner Knopf focuses on five main topics that companies must adhere to: adaptation of company policies, risk identification, implementation of preventive measures, transparent external communication, and establishment of a complaint management system.

Providing Value Added Service. *At work.*

PERSONAL CONTACT

At Kentaur, we are convinced that unparalleled solutions are born from collaborative efforts. You will, therefore, get a dedicated contact to guide you in crafting bespoke solutions that are the perfect fit for your unique requirements.

MIX&MATCH CONFIGURATOR

Looking for guidance on coordinating workwear for a new team? We have made it easier to mix and match, offering a clear view of how our varied items work together. Download your combinations and consult with customers, colleagues, and others.

EMBROIDERY, TRANSFER, AND CUSTOMIZATION

Our team is committed to providing workwear that perfectly matches your individual preferences. At our production facility in Poland, we offer a comprehensive range of personalization services, including embroidery, transfers, and tailoring for pants, sleeves, and beyond.

MARKETING AND GRAPHIC SUPPORT

Should you need any imagery, graphics, or copy you have observed from our side, do not hesitate to contact our marketing team. A collection of visuals is at your disposal for product promotion. Furthermore, feel free to amplify our social media content or request assistance for your own content related to Kentaur.

CHIP AND OVERVIEW

Want the ability to track your garments and create a list for easy identification? Our innovative solution integrates tracking chips within our full product range, enabling the effortless pairing of items with their corresponding chips for seamless organization.

OTHER SERVICES

Our commitment is to deliver exceptional service to every customer. We are at your service for:

- Applying badges.
- Bagging items.
- Stamping - up to 12 characters.

MY KENTAUR

We strive to streamline the ordering process and provide you with an easy overview of articles in stock. Therefore, we've introduced the 'My Kentaur' universe - your go-to resource for tracking your orders, checking stock levels of specific items, confirming size availability, and more.

Should you require further assistance beyond what is provided here, please reach out to your contact at Kentaur. It is our outmost priority to ensure you consistently experience top-quality service. *At work.*

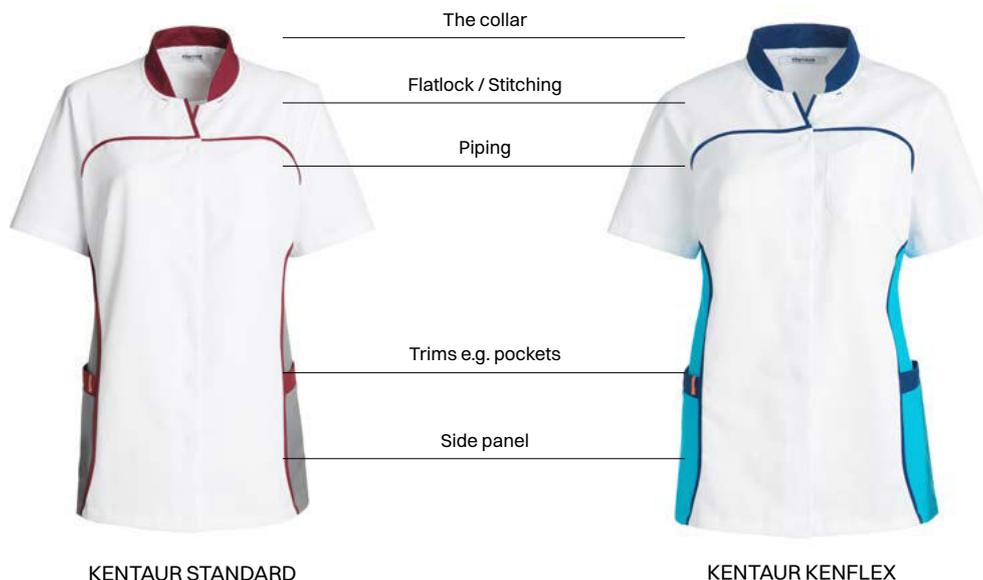

Thinking about the little details. *At work.*

With our KENFLEX service, we offer the opportunity to incorporate a personal touch into a range of standard items from Kentaur. Our goal is to simplify the process of finding workwear that aligns perfectly with your customers' needs. KENFLEX enables you to customize key design elements, crafting a tailored and standout workwear solution.

Leave an enduring impression that mirrors your customers' visual brand identity, merged with our functional, Scandinavian-inspired attire. KENFLEX empowers you to realize your vision, ensuring that your customers' teams are distinguished with elegance and style.

Explore the example provided to learn which design elements you can alter to fashion the ideal workwear for your clients.

With KENFLEX, every detail is at your fingertips, redefining professionalism. *At work.*

Key to symbols

ISO 15797

The product meets the requirements of Textile Service and can, therefore, be handled according to the ISO 15797 standard.

HACCP

The Kentaur HACCP collection is DIN 10524 certified in all three hygiene risk classes, complying with the legal requirements for food safety.

INCHES - OPTIMAL FIT

The product is supplied in inch sizes, which provides a widened range of sizes.

VAT DYED

Used to dye cellulose fibers like cotton and lyocell, these materials get the best attainable color fastness. Vat dyes withstand bleaches better than other dye types.

R&D DYED

Products are colored with reactive and dispersed dyes. Clear shades can be obtained with R&D. They do not tolerate bleaching.

BREATHE & STRETCH

The product contains materials that allow greater breathability, and mobility.

COMFORT STRETCH

The back of the product is cut on the bias, and the diagonal direction allows better elasticity and freedom of movement for the wearer.

STRETCH

Our high-quality stretch fabrics can withstand washing and drying at high temperatures without affecting the elasticity and fit.

MOBILITY SLEEVES

Products with mobility sleeves have a sleeve fit that ensures that the jacket does not slide up during movement.

PULL UP CUFF

Our Pull-Up cuffs have an elastic band and button on the cuff, making it easy to pull up the sleeve in a second.

PULL UP

Pull-Up elastic in the sleeves, which makes it easy to pull them up. Patented.

ADJUSTABLE WAIST

The product is adjustable at the waist for better fit and comfort using an elastic and button or snap fastener.

INTERLINING

The product has stiffening interlinings from Freudenberg, which meet the requirements of Textile Service (ISO 15797).

MOISTURE MANAGEMENT

The product contains fabric with moisture-absorbent benefits that keeps the wearer dry throughout the day.

ERGONOMIC NECKLINE

The neck design ensures an even distribution of the weight of the article and gives ergonomic advantages. Registered design DM221854.

THE REGULAR SILHOUETTE

The Regular Silhouette is fitting to the body without clinging. Regular is neither too tight nor too loose.

THE RELAXED SILHOUETTE

The Relaxed Silhouette has a loose fit and is looser from hip to bottom.

THE SHAPED SILHOUETTE

The Shaped Silhouette is slim at the knee and bottom, creating a slim look.

THE SLIM SILHOUETTE

The Slim Silhouette fits closely to the body, from the hips down to the feet, creating a clean appearance.

SNAP-ON APRON

The product is equipped with press buttons that allow the attachment of an apron to a chef's jacket.

NEW Oxford Shirts

The Oxford shirts are the perfect blend of casual comfort and classic elegance. Designed for various functions such as kitchen staff, service personnel, retail, reception, and other areas, where the classic Oxford style brings a timeless look. Available in different designs and colors, these shirts incorporate well-thought-out and tested features to support daily workflows.

The Oxford shirts fall under our Responsible Choice category, containing 60-70% cotton sourced from Better Cotton. Better Cotton operates on a mass balance system, meaning it cannot be guaranteed that each product contains more sustainably produced cotton. However, choosing products from Better Cotton supports a more sustainable production of cotton.

All items with cotton in our Responsible Choice category support the Better Cotton Initiative. However, only items where cotton constitutes the majority will carry the Better Cotton logo. Learn more about Better Cotton at bettercotton.org/massbalance.

We are committed to sourcing 50% of our cotton as Better Cotton by 2025.

Minimize pressure. *At work.*

SMART DESIGN - LESS PRESSURE ON THE NECK

Snap-On is our unique collection of innovative chef shirts, chef jackets, and aprons with ergonomic benefits for chefs and serving staff. The chef jackets feature concealed snap buttons, allowing users to easily and quickly attach one of our Snap-On aprons of their choice. This clever solution significantly reduces the pressure on the neck, distributing the weight evenly across the entire upper body. With our Snap-On collection, the workday can be made more comfortable for the wearer.

Thanks to the press buttons, changing the apron is also easy when it gets dirty, as it does not need to be pulled over the head to be removed. This allows for maintaining a clean and professional appearance at all times. Our Snap-On collection offers a wide range of colors, designs, and materials, making it easy to create a unique individual style. Whether one prefers a classic or more modern look, we have something for every taste. With this collection, you not only get functionality but also the opportunity to express your personal style in the workplace.

New Hybrid Chef Jacket w. TENCEL™ Lyocell

Our Hybrid Chef Jacket is a practical and innovative solution that combines both a chef jacket and an apron in one. The design of the chef jacket provides ergonomic benefits by avoiding pressure on the neck from a traditional bib apron, distributing the weight evenly across the entire upper body. Additionally, it offers kitchen staff a more breathable workwear solution, eliminating the need for wearing two layers. This is particularly advantageous in hot kitchen environments.

The clever cut in the neck enhances ergonomics and ensures that the jacket is easy to put on and take off. The improved comfort results from freeing the C7 cervical vertebra, which can reduce or even eliminate neck pain, headaches, and other discomfort caused by pressure on the cervical vertebra.

The Hybrid chef jacket is made from TENCEL™ Lyocell and recycled polyester, making it a responsible choice.

"The ergonomic V-neck is truly revolutionary, and I really appreciate the relief it provides in our hectic everyday life. The tension in the neck from the "classic" cooking posture is noticeably alleviated. Additionally, I'm pleased not to have to wear an apron strap around my neck." Matthias Gfrörer, Managing Director, Gutsküche, Hamburg, Germany.

“

I had the chance to take part in creating our uniforms together with the designer from Kentaur, and I'm very happy with the results. Apart from looking smart the material is breathable with a lovely light feel to it which makes it very pleasant to work in. The apron solution that eliminates the need for straps feels very liberating.

“

Kentaur just produces the best-suited uniforms. I have used them for several years, and I can't find a flaw. Light, trendy, comfortable clothing that lets the skin breathe easily, the team absolutely loves the uniforms, and it changes the daily mood, knowing you can be comfortable all day long. Proud to represent Kentaur.

Christian Pedersen, Executive Chef,
Hilton Dubai Palm Jumeirah, Palm West Beach, Dubai

“

As a chef, I believe that every element of my craft should be a reflection of excellence, precision, and passion. That's why I choose Kentaur as my number one choice for chefs' uniforms. Kentaur understands the demands of our profession and creates attire that marries impeccable craftsmanship with practicality. Their attention to detail ensures that I can move freely, while their use of premium fabrics guarantees comfort and durability. Kentaur's commitment to exceptional design and functionality aligns perfectly with my culinary philosophy, allowing me to express my creativity with confidence and style. When I wear Kentaur, I feel empowered to create culinary masterpieces while embodying the essence of culinary artistry.

James Knight-Paccheco, Co-Founder of Group JKP,
@jamesknightpaccheco

“

Working in the middle east, our chef jackets need to withstand heated environments, not just in the kitchen but also outside. We look at comfort, flexibility, and breathability. Therefore, we work with Kentaur, as they deliver what we need each time.

Johan Scott Valentine, Corporate Director of Culinary,
Rotana Hotel Management Corporations PJSC,
@chefscottvalentine

“

During my Culinary journey across diverse landscapes, it has taught me that the most exquisite flavors are often found in the simplest, locally sourced ingredients. Sustainability isn't a limitation; it's a pathway to unlocking the true essence of global cuisine.

Dwayne Krisko, Director of Culinary
Conrad Maldives Rangali Island

The clever closure - the Wing Jacket

Our Wing Jacket is a highly popular jacket among chefs and service personnel from various corners of the world. We refer to it as our chef/service jacket, as it is often demanded for clothing concepts aimed at retail, catering, and bakeries. The lightweight fabric makes the jacket comfortable for use in often warm environments.

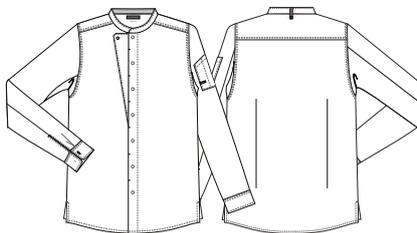

The design of the jacket is a fusion of the simple chef jacket and the classic double-breasted chef jacket. It features many different details, creating an overall more relaxed, down-to-earth appearance. The jacket has a single visible snap button at the neck, contributing to making this design truly unique.

It is available in several different colors and in various qualities to suit individual preferences.

KENTAIR

TENCEL™ LYOCELL

In our efforts to increase the use of responsible materials in our collections, our range of products with TENCEL™ Lyocell is also expanding. TENCEL™ Lyocell is not only a responsible choice because of the fibers and their resource-saving production. The material is also beneficial for laundries as products made of TENCEL™ Lyocell have a long lifetime due to their enduring color fastness and durability. Furthermore, they have a short drying time, ensuring energy savings in the washing process.

TENCEL™ Lyocell fibers are produced from the natural raw material wood in a closed-loop process, where 99.8% of the solvent is recovered. The comfortable, soft material is well-suited for workwear, as it possesses many excellent properties. The structure of TENCEL™ Lyocell fibers allows the absorption and release of moisture. These effective moisture-controlling properties support a drier microclimate on the skin, increasing the wearer's thermal comfort. This makes TENCEL™ Lyocell ideal to use in workwear worn for extended periods.

For individuals working in warm environments, the fabrics made of TENCEL™ Lyocell have additional benefits. The moisture-regulating properties also provide an unfavorable environment for odor-causing bacterium types. TENCEL™ Lyocell is, therefore, the perfect material for workwear used in the food industry.

A photograph of a chef in a white jacket, smiling slightly, working in a kitchen. The chef is in the foreground, and the background is a blurred kitchen setting. The text 'CHEF JACKET 25281' is overlaid on the left side of the image.

New Chef Jacket with TENCEL™ x REFIBRA™

AN IMPORTANT STEP TOWARDS CIRCULARITY

At Kentaur, we have an ambitious sustainability strategy, where our focus lies on a circular economy, including the production of products with recycled fibers. Through our partners, Lenzing AG and Klopman International, we have succeeded in creating products that contain recycled cotton.

To produce TENCEL™ Lyocell with REFIBRA™ technology, wood and cotton textile waste are used as raw materials. The fibers contain 30% recycled material sourced from pre- and post-consumer waste. The fabric used in our new chef jackets consists of 50% TENCEL™ Lyocell with REFIBRA™ technology and 50% recycled polyester.

TENCEL™ Lyocell fibers with REFIBRA™ technology offer the same benefits as virgin TENCEL™ Lyocell fibers, including excellent moisture absorption, temperature regulation, and naturally reduced development of odor. This fabric is the ideal choice for workwear in the gastronomy industry. It is comfortable and soft on the skin and tested to meet the quality requirements of Textile Service. This marks a significant stride towards circularity in our sustainability journey. TENCEL™ and REFIBRA™ are trademarks of Lenzing AG.

“

Kentaur chef uniforms are a great choice for chefs and kitchen workers who want a functional and stylish uniform. Kentaur chef coats are lightweight and functional, with smart details and a modern

Nordic design. They are made from durable materials, making them a great choice for chefs and kitchen workers who need a uniform that can withstand the demands of a busy kitchen. They are designed with both form and function in mind.

They are not only stylish but also practical, with features like chest pockets for easy storage of kitchen tools. Kentaur is a responsible choice for chefs and kitchen workers who care about sustainability.

Dominic Petzold, Cluster Executive Chef,
Anantara The Palm Dubai Resort

“

In our busy kitchens comfort, style, and durability are what our chefs look for in a uniform - Kentaur delivers all of these. On a personal level - I have been wearing Kentaur now for the past 3 years. The uniforms are incredibly comfortable and easy to wear, and Kentaur has a great selection of styles to choose from.

Like the rest of the Frantzén Group, I have chosen chefwear from Kentaur for the opening of the new Zén Restaurant in Singapore. The chefwear from Kentaur suits our DNA as it is classic, fashionable, and nice to wear in our surrounding climate. Also, it is important that we can get replenishment immediately when needed and can get the same styles over many years.

New Performance Suit

Our Performance Suit is designed for employees in reception, gastronomy, and various other environments where dressing neatly and formally is crucial, but at the same time, there is a desire to be able to send the clothing to a laundry service. Behind the collection are years of model development and a quest for the perfect quality that our laundry customers can incorporate into their regular washing processes.

The fabric for this collection is a blend of REPREVE® recycled polyester and Creora Power Fit. The fabric, with its 4-way stretch, provides full mobility for the wearer. It withstands high heat and maintains its shape, making it particularly suitable for industrial washing. Moreover, the material stands out for its exceptional durability, thanks to the inclusion of polyester, ensuring long-lasting durability even under particularly challenging conditions. Our Performance Suit combines functionality and style, making it the ideal choice.

NEW Oxford Shirts

The Oxford shirts are the perfect blend of casual comfort and classic elegance. Designed for various functions such as kitchen staff, service personnel, retail, reception, and other areas, where the classic Oxford style brings a timeless look. Available in different designs and colors, these shirts incorporate well-thought-out and tested features to support daily workflows.

The Oxford shirts fall under our Responsible Choice category, containing 60-70% cotton sourced from Better Cotton. Better Cotton operates on a mass balance system, meaning it cannot be guaranteed that each product contains more sustainably produced cotton. However, choosing products from Better Cotton supports a more sustainable production of cotton.

All items with cotton in our Responsible Choice category support the Better Cotton Initiative. However, only items where cotton constitutes the majority will carry the Better Cotton logo. Learn more about Better Cotton at bettercotton.org/massbalance.

We are committed to sourcing 50% of our cotton as Better Cotton by 2025.

BetterCotton.org/MassBalance

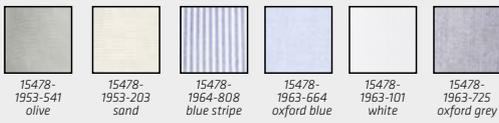

By choosing our cotton products, you're supporting our investment in Better Cotton's mission.

This product is sourced via a system of mass balance and therefore may not contain Better Cotton.

Silhouette Guide

SHAPED SILHOUETTE

The shaped silhouette is slim at the knee and bottom, creating a slim look.

Article no.: 16319-79-700

Article no.: 18190-1401-700

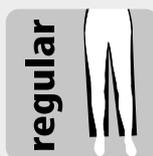

RELAXED SILHOUETTE

The relaxed silhouette has a loose fit and is looser from hip to bottom.

Article no.: 16221-105-700

REGULAR SILHOUETTE

The regular silhouette is fitting to the body without clinging. Regular is neither too tight nor too loose.

Finding the right style. *At work.*

When developing our products, we always strive to create items that can be used across various industries. This is to provide our customers from the textile service industry with the flexibility to tailor their offerings as precisely as possible.

In this spirit, you will also notice that several of our styles are presented under different headings in this catalog.

For example, our Unisex pants 16221, which are available in different colors and patterns, making them suitable across multiple industries. The same applies to our Active Pants 16219, equipped with various features that provide versatile solutions for different job functions.

Furthermore, many of our pants are available in various inseam lengths and detailed at each item.

Our goal is to simplify the process of discovering the ideal pants tailored to your specific needs, with the right features and benefits.

“

As a winner of "Bocuse D'or" 2019, I am very aware of all the details in my work. Clothing is a significant factor. When I choose chef clothing I focus on elegance, comfort and functionality - all these parameters are included in the clothes from Kentaur.

Kenneth Toft-Hansen, Head Chef,
Svinkløv Badehotel, Denmark, @svinkloevbadehotel

“

The high standard and user duration of Kentaur's chef wear is in line with my vision as a chef and entrepreneur regarding quality and sustainability. The wide range of models and materials of Kentaur's chef wear has made it possible for me to find a perfect match for all the different restaurants and concepts we have opened over the last 8 years. I am still very happy and proud to work with this brand that keeps developing and improving their products just like we try to do.

Freek Van Nortwijk, Co-owner,
The Breda Group, Amsterdam, @restaurantkleinbreda

CHEF JACKET

Robert Sandberg, Chef, Habitué, Los Angeles

APRON
31320

New Wrap- Around

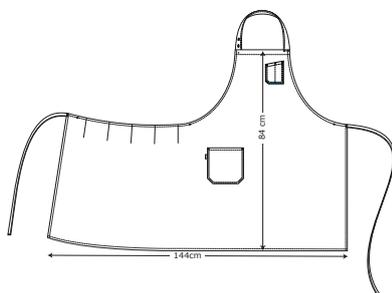

Our Wrap-Around apron is designed with a unique feature where the apron "wraps" all the way around. With its two pockets, the apron is ideal for service and food personnel, providing great space for various work tools.

The apron features an adjustable neck strap, making it easy to customize the length of the apron. Thus, our Wrap-Around apron can be used for various sizes.

31320 WRAP-AROUND APRON

- Adjustable neck strap
- Divided chest pocket
- 1 hip pocket
- Form-fitting with dart
- W: 144 cm x H: 84 cm
- Size one size

102 65/35% PES/CO, 210g/m²

A photograph of a waiter from behind, wearing a white long-sleeved shirt and a black crossback apron. He is holding a wine glass on a black tray. The background is a bright, out-of-focus restaurant interior.

APRON
30461

New Crossback

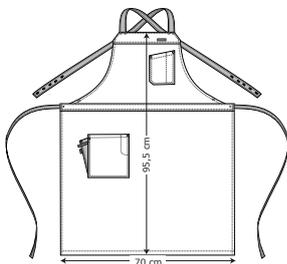

With its ergonomic Crossback design, Kentaur's Crossback apron ensures that the weight of the apron is not centered on the neck but is evenly distributed across the upper body. This is particularly advantageous if one frequently carries tools in the pockets of the apron, making it heavier which can cause neck pain and headaches, when wearing a traditional apron.

The Crossback apron comes in various designs and colors, making it possible to find the right apron for everyone.

2IN1 APRON 30360

Use the apron as a practical solution to safeguard your shirt or jacket from unwanted stains or get creative - fold it in half and transform it into a stylish waiter's apron.

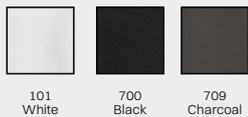

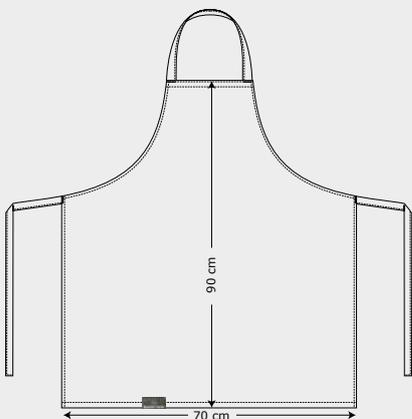

Circular Touch - an important step towards circularity

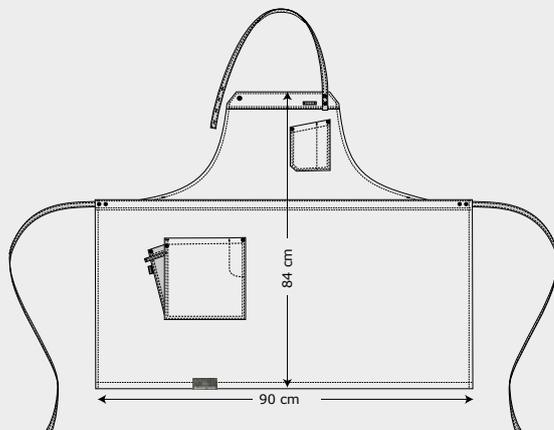

Our Circular Touch aprons are crafted from mechanically recycled cotton and polyester coming from textiles that have reached the end of their first lifecycle. The recycled material constitutes 15% of the fabric, carefully selected from premium-quality textiles to ensure both high durability and a long lifespan. Ensuring items that endure, wash after wash, is crucial for us. Therefore, we consistently subject our fabric to tests for factors such as abrasion resistance, durability, and colorfastness.

By choosing our Circular Touch aprons, you are making a more responsible choice compared to aprons solely composed of virgin materials.

“

Kentaur is a quality brand that strives for everyone to feel well-dressed in well-fitted, comfortable workwear. They ensure that everyone finds the right size, even if that size isn't in the catalog. Quality and durability characterize Kentaur. It's not just about the price; it's the overall picture that matters. That's why Kentaur is my choice.

Bengt Sjöström, Head Chef & Gastronomic Manager,
Oslo Congress Centre

CHEF SHIRT
25236

“

I love the comfort of Kentaur. It's light and pleasant to wear, yet durable. Moreover, it's easy to care for and long-lasting!

Lukas Kienbauer, Owner,
Lukas Restaurant, @lukas.kienbauer

“

All twelve of my Kentaur jackets are exceptionally comfortable, each possessing unique features. Some are longer, others shorter; some share the same color and sleeve length, while others exhibit a complete contrast.

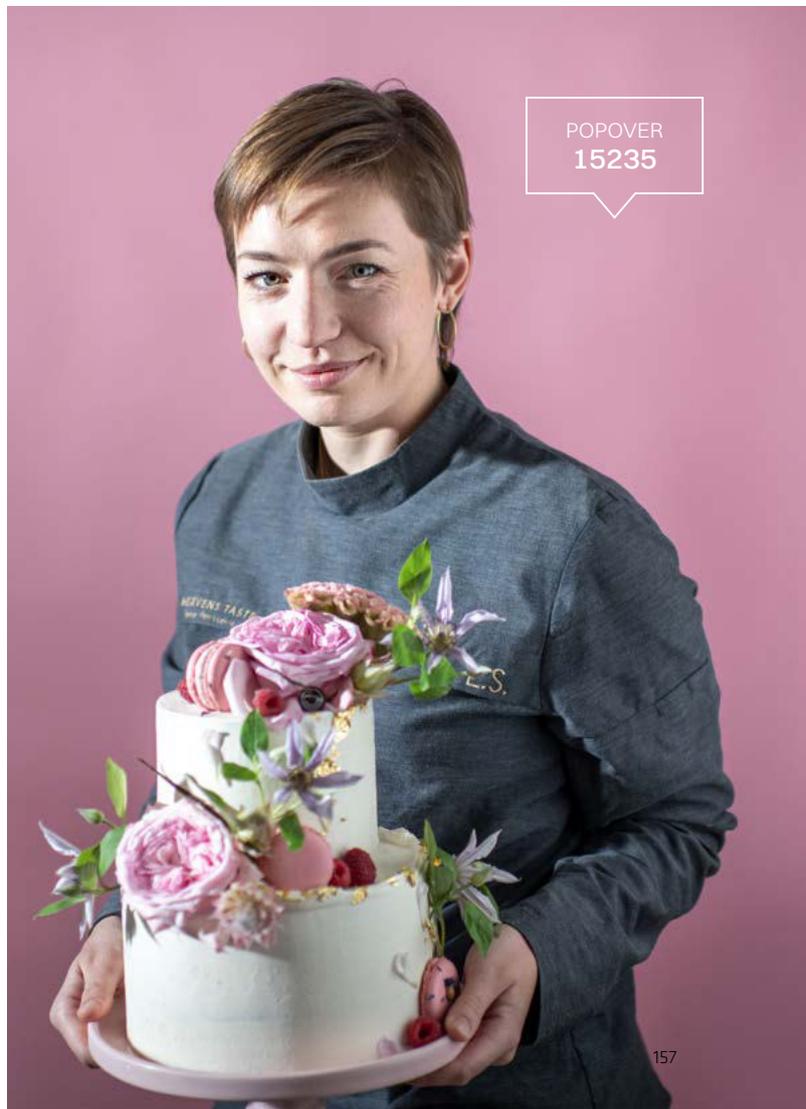

Let me elaborate on my first preference: I personally favor the slightly looser ones. This is because I navigate not only around the kitchen stove but also in the hall, surrounded by tables or on platforms during conferences. The added looseness truly contributes to my comfort in any given situation.

Deivydas Praspaliauskas, Chef,
Amandus Restaurant, @amandus.restaurant

“

I am extremely enthusiastic about our Kentaur workwear. The clothes are easy to wear, very comfortable and pleasant on the skin. Customers often mention that the workwear looks very appealing, professional and stylish. Here you can clearly see the quality standards.

Laura Schönberger, Pastry Chef,
Heavens Taste, Regensburg, Germany, @heavens_taste_

Hygiene Risk

The Kentaur HACCP collection is DIN 10524
certified in all three hygiene risk classes

RISK CLASS ONE

LOW HYGIENE RISK

If the hygiene risk is low, when handling non-perishable foods or ingredients, work wear has a relatively low protective function against contact with foods, provided that the foods are sufficiently protected by packaging. This risk class includes handling for example coffee or potato crisps.

RISK CLASS TWO

HIGH HYGIENE RISK

If the hygiene risk is high, e.g. when handling foods or ingredients that are perishable and not packaged, work wear has a greater function as protection against contact with foods. Especially if the foods are not to be processed further, and if there is a risk that microorganisms in or on the foods can multiply (e.g. when supplying unpackaged meat). This group also includes activities that involve processing foods, either manually or technologically, which can influence bacterial reproduction, e.g. drying, salting, heat processes etc.

RISK CLASS THREE

HIGHEST HYGIENE RISK

If the hygiene risk is at the highest level, e.g. when handling unpackaged, ready-to-eat or extremely perishable foods, a very high degree of protection must be guaranteed, since the foods are not technologically stabilised, and microorganisms can reproduce. This risk class includes handling for example fresh salads and meat spreads for bread.

BASIC BUILD | NORWEGIAN STANDARD & COMFY FIT

CROSS NECK
15519

NEW Comfy Fit

Comfy Fit is an innovative collection designed with specific ergonomic benefits for healthcare professionals. The upper part of our collection features our "Ergonomic Neckline," a design-protected cut in the neck region that has been tested by the Hohenstein Textile Testing Institute and a focus group and is exclusively available at Kentaur. This cut relieves the cervical vertebra C7 from potential pressure, reducing the risk of headaches, neck pain, and numbness in the shoulders, arms, and fingers. The material for the Comfy Fit collection consists of TENCEL™ Lyocell blended with polyester.

TENCEL™ Lyocell is known not only for being a more responsible choice but also for its reputation for providing comfort. This is evident in its moisture-absorbing benefits, preventing bacterial formation, which makes it an optimal material for healthcare workwear. Also, the lightweight fabric dries quickly after washing.

Comfy Fit combines style, functionality, and ergonomic benefits to meet the needs of the healthcare sector, making it a perfect solution for professionals in the industry.

New Performance Line

Our Performance Line is designed for individuals in the healthcare sector and service industry. The collection consists of two pants and two vests with a modern, functional design. The unique feature of our Performance Line is our design-protected cut in the neck, exclusively available at Kentaur, along with the material composition of 90% REPVEVE® recycled polyester and 10% Creora® Power Fit elastane. Creora® Power Fit has an exceptionally high-performance stretch quality, providing the user with full mobility.

It also has high heat resistance, ensuring elasticity and shape - wash after wash. The quality and longevity of the articles make the Performance Line a responsible choice compared to products in conventional materials. This collection particularly focuses on solutions that contribute to a good workday - because we understand that the right workwear is crucial for increasing job satisfaction.

Active Line

Active Line is a versatile collection that includes pants, a smock, and a jacket. All styles in this collection are made from 50% recycled polyester and 50% conventional polyester. Therefore, by choosing this collection you are making a responsible choice.

With its 4-Way-Stretch, Active Line is designed to provide the wearer with full mobility, offering the freedom to perform tasks comfortably and efficiently. The lightweight fabric ensures that the clothing will not bother the wearer during the workday and that it dries quickly after washing.

The collection features several clever functions that support a productive workday, making it the ideal choice for those who demand both comfort and functionality from their workwear.

Pique Line

Pique Line is a versatile collection of tops designed for professionals in the healthcare- and service industries. The knitted part (pique) in this collection provides the user with greater freedom of movement, significantly improving comfort. The woven part ensures stability where it is needed, such as on the sides where the pockets are located.

The design is a fusion of the popular polo, known for its comfort, and the tunic, offering functionality with pockets, mobile pockets, and key loops. This creates a unique collection of tops suitable for various industries. Pique Line includes a variety of colors and designs, providing great opportunity to find the style that best suits the wearer.

Scrubs with TENCEL™ Lyocell

PANTS
16949

The TENCEL™ Lyocell fibers are produced in an environmentally conscious manufacturing process from the natural raw material wood. Products made of TENCEL™ Lyocell have a long lifetime due to their durability and color fastness. Due to its lightweight nature, articles with TENCEL™ Lyocell require limited drying time, which ensures energy savings in the washing process. The comfortable, soft material is well-suited for workwear as it possesses many excellent qualities.

For those who are physically active for many hours at work, TENCEL™ Lyocell is also highly suitable. The effective moisture control of TENCEL™ Lyocell fibers supports a natural dry feeling. The fabric is temperature-regulating and very skin-friendly. Hence, this fabric works great in workwear for healthcare professionals and others working in the healthcare sector. TENCEL™ Lyocell fibers absorb sweat efficiently, resulting in reduced moisture on the fiber surface. This creates a less favorable environment for the growth of odor-causing bacteria. Therefore, this material is particularly well-suited for workwear used in the healthcare sector.

16410-1412-101

16410-1412-101

IT IS CRUCIAL TO FEEL COMFORTABLE

We believe that a good workday starts with the right workwear. Only when feeling comfortable you can perform your job properly. Therefore, it is an integral concept at Kentaur that we develop clothing that meets individual needs, especially regarding fit.

To emphasize this, we organized a photo shoot with our own colleagues, where everyone wore the same pants (16410). Despite widely different shapes and sizes, we have pants that

fit everyone. For us, it is never a problem to find workwear that fits a larger team. Because workwear is much more than just clothing.

The development of our products happens in close collaboration with focus groups consisting of people from relevant jobs and functions.

This collaboration provides us with valuable insights into their

16410-1412-101

16410-1412-101

16410-1412-101

needs and preferences, ensuring a practical approach to the task with attention to detail.

Improper workwear can quickly contribute to creating poor working conditions. We are determined to ensure that our users never experience this irritation.

To guarantee workwear that fits most, we involve our own colleagues in the development phase. Specifically, we have

them to try on the clothes and tailor to their body types. This gives us the best conditions to create workwear with complete and uncompromising freedom of movement.

At the same time, it provides us with the best opportunities to create a good fit, regardless of the body type. Thus, the wearer experiences comfort and can consistently deliver an optimal performance - each day.

Silhouette Guide

RELAXED SILHOUETTE

The Relaxed Silhouette has a loose fit and is looser from hip to bottom.

Article no.: 18130-100-101

SHAPED SILHOUETTE

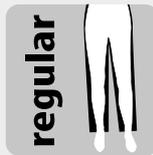

The Shaped Silhouette is slim at the knee and bottom, creating a slim look.

Article no.: 16410-1412-101

Article no.: 16435-1412-101

REGULAR SILHOUETTE

The Regular Silhouette is fitting to the body without clinging. Regular is neither too tight nor too loose.

Article no.: 16490-4300-101

SLIM SILHOUETTE

The Slim Silhouette fits closely to the body, from the hips down to the feet, creating a clean appearance.

Finding the right style. *At work.*

When developing our products, we always strive to create items that can be used across various industries. This is to provide our customers from the textile service industry with the flexibility to tailor their offerings as precisely as possible. In this spirit, you will also notice that several of our styles are presented under different headings in this catalog.

For example, our Unisex pants 16221, which are available in different colors and patterns, making them suitable across multiple industries. The same applies to our Active Pants 16219, equipped with various features that provide versatile solutions for different job functions.

Furthermore, many of our pants are available in various inseam lengths and detailed at each item.

Our goal is to simplify the process of discovering the ideal pants tailored to your specific needs, with the right features and benefits.

PRO WEAR BY ID[®]

Hard work calls for clothes designed for movement and wear. PRO wear by ID[®] is the solution for employees who are physically active in their work, and who need clothes that withstand hard wear day after day. PRO wear by ID[®] is available in many sizes and variations, but all products are designed for movement, and are comfortable to wear in any working position. The clothes are pre-shrunk, so you can always rely on the fit. White garments withstand daily washing at temperatures up to 80 degrees, while colored garments can be washed at 60 degrees.

ID[®] 10 principles

With the UN Global Compact as the point of departure.

ID[®] takes its responsibility as a clothing manufacturer seriously. ID[®] has therefore drawn up a Code of Conduct which sets out requirements for suppliers and business partners. When you trade with ID[®], you can trade with a clear conscience - and when your customers trade with you, you can recommend ID[®]'s products as ethically responsible.

DANISH WIND POWER

ID[®] has reorganised 100% of its energy purchases to renewable and CO2-neutral energy produced by Danish wind power.

01 Child labour  ID [®] will support effective abolition of child labour.	06 Forced labour  ID [®] will support abolition of all forms of forced labour.
02 Working hours and rest periods  ID [®] will comply with current national legislation and industry standards on working hours, rest and holidays.	07 Anti corruption  ID [®] will resist all forms of corruption, such as blackmail and bribery.
03 Wages and conditions of employment  ID [®] will support abolition of discrimination in working conditions and employment terms.	08 The working environment  ID [®] will secure a safe, healthy work environment and prevent potential accidents and injuries.
04 Law and legislation  ID [®] will support and respect protection of internationally declared human rights.	09 Environmental impact  ID [®] will support a cautious approach to environmental challenges and take initiatives to promote greater responsibility for the environment.
05 Differential treatment  ID [®] will ensure that we do not participate in violations of human rights.	10 Freedom of association  ID [®] will uphold freedom of association and effectively recognise the right to collective negotiation.

Certifications & Memberships

BETTER COTTON

ID® is a member of the Better Cotton Initiative. Better Cotton exists to make global cotton production better for the people who produce it, better for the environment it grows in and better for the future of the industry. Better Cotton is sourced via a system of Mass Balance and is not physically traceable to end products. By using a system of Mass Balance, BCI can reach more farmers, meaning more sustainable practices are being implemented around the world.

UN GLOBAL COMPACT

ID® is a member of Global Compact. ID® wants to act responsibly and contribute to a sustainable development. The membership provides ID® with a basis for working with the internationally acknowledged conventions about: Human rights – Employees' rights – Environment – Anti corruption.

AMFORI

ID® is a member of Amfori BSCI. BSCI (Business Social Compliance Initiative) is a network of 2.400+ European companies which have formulated a set of common ethical principles for purchasing and production in non-EU countries. This means production where there is no child labour, forced labour or any form of discrimination, the guarantee of a safe

working environment and reasonable wages and working hours. The rules also carefully consider the environment.

INTERNATIONAL ACCORD

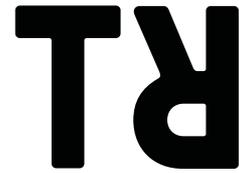

The Accord on Fire and Building Safety in Bangladesh (the Accord), from November 2023, is a three-year independent, legally binding agreement between apparel brands and retailers and trade unions designed to build safe and healthy Bangladeshi Ready made Garment (RmG) Industry.

BUREAU VERITAS

The Bureau Veritas Group is one of today's largest companies in the world within inspection, classification, counseling, and certification. They supply services of high quality, safety, environmental protection, and social responsibility.

TEKSTILREVOLUTIONEN (TEXTILE REVOLUTION)

ID® is a member of the Textile Revolution, a textile policy think tank working for a textile industry that makes a positive impact on the world and the people who live in it. In collaboration with the Textile Revolution, ID® wants to become a frontrunner in the circular transition by calculating our climate and en-

This is our **Communication on Progress** in implementing the principles of the **United Nations Global Compact** and supporting broader UN goals.

We welcome feedback on its contents.

Move Forward with Confidence

environmental footprint and then implementing circular solutions where the product is used in new ways at the end of its life.

ECOLABEL

The Ecolabel is your guarantee that clothing bearing the EU Ecolabel impacts the environment as little as possible and ensures that the clothing does not contain pesticide residues and other environmentally harmful chemicals, that eco-friendly dyes have been used and that wastewater is handled responsibly.

TENCEL™ LYOCELL

TENCEL™ Lyocell fibers are derived from controlled or certified wood sources and produced in a closed loop process which recovers 99.8% of the solvent - resulting in a close-to-zero wastage. TENCEL™ is a trademark of Lenzing AG.

HACCP DIN 10524

The product has been developed to meet the hygiene requirements for food production as defined in HACCP - certified by Hohenstein.

ISO 15797

ISO 15797 is an international standard for evaluating a product's suitability for industrial washing.

The tests are carried out in close cooperation with external experts.

OEKO-TEX® STANDARD 100 - ANNEX 4, PRODUCT CLASS 2

Is subject to requirements covering pH value and the content of, for example, pesticides and heavy metals.

OEKO-TEX® STANDARD 100 - ANNEX 6, PRODUCT CLASS 1

Places even stricter requirements on the content of hazardous to human health and the environment.

OEKO-TEX® STANDARD 100 - RECYCLED, ANNEX 6, PRODUCT CLASS 1

Places additional, more stringent requirements on products which contain more than 20% recycled fiber material and are subjected to special test processes.

PRO Wear by ID[®]

All PRO Wear by ID[®] products have been pre-shrunk at very high temperatures, both before and after dyeing, for extra stability and long life.

BETTER COTTON

Kentaur is a proud member of the Better Cotton Initiative. With our membership, we have committed ourselves to improving global cotton cultivation. Better Cotton operates as a mass-balance system. Hence, purchasing a product with the Better Cotton logo is not a guarantee that the product itself contains cotton from Better Cotton-certified farming. However, by buying a product with sourced Better Cotton, you contribute to a more sustainable production of cotton.

All the cotton used in our products labeled "Responsible Choice" comes from Better Cotton. However, we only mark products with the Better Cotton logo when cotton is the dominant material in the product. If you want to learn more about Better Cotton, visit bettercotton.org/massbalance. We are committed to sourcing 50% of our cotton as Better Cotton by 2025.

REPREVE® RECYCLED POLYESTER (RPES)

REPREVE® is polyester made from used plastic bottles. REPREVE® works to create a cycle where waste is recycled.

TENCEL™ LYOCELL

TENCEL™ Lyocell fibers are derived from controlled or certified wood sources and produced in a closed loop process, which recovers 99,8% of the solvent – resulting in a close-to-zero wastage. The fibers support a natural dry feeling through moisture control and are naturally soft and smooth to the touch. TENCEL™ is a trademark of Lenzing AG.

TENCEL™ LYOCELL X REFIBRA™ TECHNOLOGY

To produce TENCEL™ Lyocell with REFIBRA™ Technology, wood and cotton textile waste is used as raw materials. The fibers contain a minimum of 30% recycled materials. TENCEL™ Lyocell fibers with REFIBRA™ Technology offer the same benefits as standard TENCEL™ Lyocell fibers. Like TENCEL™, REFIBRA™ is also a trademark of Lenzing AG.

COTTON (CO)

Cotton is a soft natural fiber, and absorbs moisture well, giving it a high comfort level. In addition, cotton is very hard wearing, only superseded by synthetic fibers, and thus it is ideal in blends with polyester when a durable, hard-wearing material is required.

POLYESTER (PES)

Polyester is the most widely used synthetic fiber. When it is blended with cotton, the optimal mix is 65% PES / 35% CO regarding durability and suitability for washing. Polyester enhances the PES/CO blend with qualities such as strength, minimal shrinkage, crease resistance and short drying time. This makes PES/CO blends highly suitable for workwear.

ELASTANE/EOL/EME/MECHANICAL STRETCH

Many of our qualities are stretch fabrics, as elasticity increases comfort. It is important to ensure high recovery, so that elasticity and comfort are maintained throughout the product's lifetime. As a rule, Kentaur uses stretch fabrics in which elasticity is achieved

through firmly spun yarns and the weaving technique (mechanical stretch/natural stretch) or elastic fibers which can withstand washing in industrial laundries without losing elasticity.

TWILL

Twill is a weave characterized by the distinctive slanting stripes, known from the denim fabric used for jeans. The twill construction produces a structured surface and a supple fabric. Many of Kentaur's fabrics are twill, because this fabric is good for pants, upper parts, and aprons.

PLAIN /PANAMA

Plain weave is the simplest weave. It is the same on the right side and the reverse side, firm and stable, and produces a strong fabric. Plain weave is normally used for the lighter products such as shirts and functional shirts. Panama is derived from the plain weave, but there are fewer binding points, which produces a softer and more supple fabric. Panama is normally woven in thicker yarns, which combines with the weave to produce a smart structured surface. Panama is used for aprons in Kentaur's collection.

PIQUE

Pique is a knitted construction that is known from polo shirts. At Kentaur pique is used in garments in our HoReCa & Retail and Healthcare & Service segments. Knitted fabrics generally increase the comfort for the wearer since they have greater elasticity and allow greater freedom of movement than woven fabrics. We collaborate with different producers to ensure that pique fabrics can be washed in accordance with ISO 15797 and meet requirements for stability of shape and color fastness.

DYEING

For Textile Service, good color fastness is important, and the greater part of Kentaur's collection is therefore vat dyed. Vat dyes give the best achievable color fastness to light, weather and washing, and furthermore, they withstand bleaches better than other dyes, ensuring that Kentaur products can be handled according to ISO 15797 and a variety of hygiene standards. Our OEKO-TEX® STANDARD 100 certificate ensures that the dyes and chemicals that are used comply with REACH.

MATERIALS WITH RECYCLED TEXTILES

Our materials with recycled textiles contain recycled textile fibers from pre- and/or post-consumer textiles. Pre-consumer textiles are textile waste from production, while post-consumer textiles are textiles that have been worn out in their current form. The material quality is developed for industrial laundries, ensuring good durability and colorfastness. The percentage of recycled material in the fabrics can vary from style to style. If you want to know the precise percentage of recycled material, you can always find this information on the individual product.
