FARE 70 YEARS

ENTHUSIASM FOR UMBRELLAS – YESTERDAY, TODAY AND TOMORROW

Dear Customers

Founded in 1955, FARE has developed into one of the **European market leaders** for advertising umbrellas in 70 years. Today, the **largest umbrella portfolio** (over 130 models in over 730 colour variants) with proven **FARE quality** and a constant stream of new **innovations** impresses satisfied customers in over 30 countries.

Our **Windfighter®** umbrella brand is a prime example of our consistency, which we always combine with the knowledge of the present to shape the future: In 2000, we had the Windfighters certified by **TÜV**. We have completely revised three of these popular top-of-the-range models for our anniversary year 2025, given them a contemporary design language and added sustainable features.

We look forward to continuing to be your **reliable partner** and contributing to your **business success** in our anniversary year as well.

Yours faithfully, Volker Griesel
Managing Director

WATER-SAVING COLOURED COVER MATERIAL MADE FROM RECYCLED PLASTICS

Thinking progressively is good – but it's progressive action that makes the difference. As part of our sustainability strategy, we introduced the **revolutionary waterSAVE® dyeing process** in 2020: The yarn, which is made from recycled plastics, is dyed all the way through during the production process.

This has **advantages for the environment** compared to the conventional process, in which the yarn is first produced and then dyed in a further step.

AND THIS IS HOW IT WORKS:

Plastic waste is collected, cleaned ...

... and processed into granulate.

When heated and melted, it becomes a polyester fibre, ...

... which, woven as fabric, becomes the **cover of our umbrellas**!

All **waterSAVE®** models are **labelled on the closing strap**, which only becomes visible when opened.

WATERSAVE® IS COLOURFUL!

While initially only black umbrellas could be fitted with this sustainable cover in 2021, **additional colours and many models** have been added since 2022. For example, our popular **ÖkoBrella family** has been converted to **waterSAVE®** cover material.

SUSTAINABLE HANDLES MADE OF RECYCLED ABS – ECO-FRIENDLY AND HIGH-QUALITY

Recycled **A**crylonitrile **B**utadiene **S**tyrene (**rABS**) consists of disposed ABS products that are processed into new high-quality products – **recycling in top form**.

rABS retains the strength, durability and impact resistance of the original material, while **significantly reducing the carbon footprint** by giving the raw material a second life. The aesthetic appearance can be seen, for example, in the handles of our **new Windfighter® models**.

* Calculated based on water savings of 2 million litres of water for processing around 300,000 m² of fabric, from which around 350,000 umbrellas can be produced.
