GLOSSARY

Perfect for athletes! The fibre is cut in a special way to offer excellent breathability and rapid evaporation of surface moisture. The garment does not stick to the skin, thus allowing longer periods of exertion.

Ultra-breathable and very light fabric, ideal for all types of training. This technology identifies areas of heat and perspiration, providing optimum temperature and perspiration regulation through air circulation.

Water repellent materials have been treated with a product designed to repel water. Water flows in droplets and cannot soak into the fabric which remains breathable.

Flexfit® technology; elasticated inner comfort band.

Waterproof garment or fabric. The figure shown corresponds to the fabric's ability to withstand water pressure without allowing moisture to penetrate. The minimum standard is a water column of 1,500 mm/m².

LYCRA® clothing is high in elasticity, allowing it to return to its original shape after stretching. This fabric also dries quickly.

Enzyme washing is a special biopolishing treatment that makes fabrics clean, smooth and blemish-free, creating a surface that is soft to the touch and perfect for printing.

(Low Shrinkage Fleece): high-quality fleece, 80% combed cotton, 20% polyester with low shrinkage. The inner and outer faces of the fabric contain a continuous filament that offers excellent resistance to washing. The outer face is perfect for printing, while the inner face is extremely comfortable.

LST (Low Shrinkage Terry): high-quality French terry treated to significantly reduce shrinkage; perfect printing, excellent comfort.

LSI (Low Shrinkage Interlock): high-quality interlock treated to significantly reduce shrinkage; perfect printing, excellent comfort.
